

LAURIE FAGUNDES, CPP

PROFILE

Provider of Payroll Consulting Services, since 2001, including project management of payroll system implementations, outsourcing implementations, integration of acquired companies into existing payroll systems, payroll accounting, process reengineering and documentation.

RECENT PROJECTS

AUTHOR

Author of “The Practical CPP Study Guide” and “The Practical CPP Study Tools”. Prospective CPPs use the guide to study for the APA certification exam. The guide covers all the areas of content in the exam. The study tools include online practice questions, practice calculations and flashcards to further assist CPP candidates in their exam preparation.

COURSE FACILITATOR – PAYROLL PRACTICE AND MANAGEMENT

Provide support and guidance to assist students throughout this comprehensive payroll course. Grade student essay exams. Answer student questions via email and live chat sessions.

PROJECT MANAGER – PAYROLL SYSTEM IMPLEMENTATIONS

Responsible for implementation scheduling, planning, requirements definition and testing. Defined and performed test cases for user acceptance of payroll, HR and time attendance systems.

PAYROLL OUTSOURCING PROCESS LEAD VENDOR-SIDE

Interviewed client to understand existing HR & Payroll policies and processes. Based on findings, developed and documented new payroll processes for implementation of payroll outsourcing (vendor-side). Created forms and defined interface specifications to import data to payroll system. Trained vendor staff on new procedures. Conducted end-to-end testing of new processes.

PAYROLL OUTSOURCING CLIENT-SIDE PROJECT MANAGEMENT

Client-side project management of payroll department outsourcing including communication of client policies and processing requirements to vendor. Reviewed vendor Knowledge Base content for accuracy. Coordinated development of communication plan. Reviewed and approved process flows documented by vendor. Audited results of user acceptance testing.

KRONOS IMPLEMENTATION

Project management of time and attendance system implementation for employee base of 10,000. Worked with vendor to design system configuration to meet client needs, defined pay rules, defined interface specifications, validated employee data loads, developed test cases, conducted acceptance testing, defined and documented internal processes and created manager/employee job aids.
